

HEAVY DUTY FILM SLITTER A23HD

LIMITED BLADE EXPOSURE

Helps reduce injury risk

The A23HD Film Slitter is an ergonomic cutter with finger hole to prevent slipping. Heavy Duty recessed blade with larger blade exposure to cut thicker materials or multiple layers. It is extremely lightweight and allows your hand to handle other tasks or holding items while the slitter is still on your finger. It is perfect for opening cartons, slitting film, bubble wrap, tape and cutting seatbelts. The concealed blade design allows the blade cannot come close to you or your goods, reducing the risk of having unerase injuries.
