## Timestrip® 12 Hours Room temperature

### Button On Top

#### TS-311

#### General:

Each Timestrip® indicator is a small, self-adhesive label that can be attached to or integrated into a product, package or carrying card\* (\*see adhesive specification in Appendix 1 below for further details). It monitors elapsed time and indicates when key time markers and a pre-defined elapsed time have been reached. The indication of elapsed time is irreversible. Indicators can be made for many different temperature environments, but each product is calibrated for use in a specific temperature environment.

Timestrip® 12 hours is calibrated for use at room temperature. Using this product in other temperature environments may affect its performance.

#### How to use:

Timestrip® indicators are completely inert prior to activation and can be stored at room temperature.

To activate fully squeeze the button and within 2 minutes the word ON will appear. If not, immediately re-squeeze the button fully. When ON appears, the indicator is armed and ready to use. The blue dye will continue to progress until the maximum elapsed time has been reached.
