

The ShockLog® Cellular Impact Recording and Tracking System combines advanced tri-axial piezoelectric accelerometer technology with sophisticated electronics and software to offer an advanced shock and vibration data logger with real-time tracking. When a programmed impact level is exceeded, a detailed event curve will be recorded, and the ShockLog Cellular module will send a real-time alert letting you know when and where a potentially damaging impact has occurred. Benefit from knowing where your asset is with location messages sent on a user programmable interval (1 hour to 24 hours).

SPOTSEE CLOUD

The cloud-based software can be accessed anywhere with a secure login. Chrome, IE, and Firefox are supported browsers.

Each user has a secure account access. Data from the ShockLog Cellular is stored in the cloud where journey information such as location of impacts, impacts over time, impact histogram, and temperature are visualized.

SHOCKLOG® DESKTOP SOFTWARE

The ShockLog® software runs on a desktop or laptop PC using the Windows XP, Vista, Windows 7, Windows 8, or Windows 10 operating systems.

The software allows the operator to configure the ShockLog Cellular and to extract and examine data records from the instrument.

Reports may be viewed on screen and selected data exported to other applications. Six different reports are available: download, summary, events summary, event details, time slot, and log data.

Review your ShockLog Cellular device journey through the simple Windows®-based desktop software program. The software allows for configuration of the ShockLog, data extraction, and analysis. The ShockLog Report View provides users with an overview of the entire journey. ShockLog software provides peak acceleration values for all three axes reported on a time basis as well a detailed impact curve. Additional environmental conditions can be monitored and displayed, if desired. Users are able to zoom in for a closer view, or export data into programs such as Excel and MatLab for more detailed analysis.

MOUNTING

A mounting plate, device mounting hardware and magnetic feet are included with the ShockLog Cellular.

The mounting plate is 8 in x 8.5 in / 20.32 cm x 21.59 cm
