

Impact Indicators Comparison Guide

For over 40 years, ShockWatch has been a market leader in shipping damage prevention. Using simple indicators to alert handlers that a package is being

monitored and requires extra care will ultimately reduce damage related costs. ShockWatch Impact Indicators drive accountability throughout a supply

chain. An indicator program saves time and reduces overall costs by focusing attention on packages that have been mishandled.

Specifications

	ShockWatch Label	ShockDot	ShockWatch 2	ShockWatch RFID
Sensitivity Range	25 – 100G	25 – 100G	5 – 75G	5 – 75G
Security	Tamper-proof	Tamper-proof	Tamper-proof	Tamper-proof
Serialisation	Available	Yes	Yes	Yes
QR Code	No	Yes	No	No
Sensitivity NOT affected by orientation	No	Yes	No	No
Armability	Always Live	Always Live	Field-armable	Field-armable

Selection Guide

Selecting the right ShockWatch Indicator is a simple process. Start with your shipment size and weight. The selection guide provides a starting point

for sensitivity selection. The Indicator best suited to your application will also take into account product fragility and packaging. More fragile products

may require a more sensitive (lower G-force) Indicator while products with more robust packaging may need a less sensitive (higher G-force) Indicator.
