Maintain workplace social distancing.

claitec

The ShockWatch Social Distancing System (SDS) is a proximity monitoring solution designed to maintain the recommended safe physical distance between people within a workplace (offices, warehouses, logistics centres, workshops, etc).

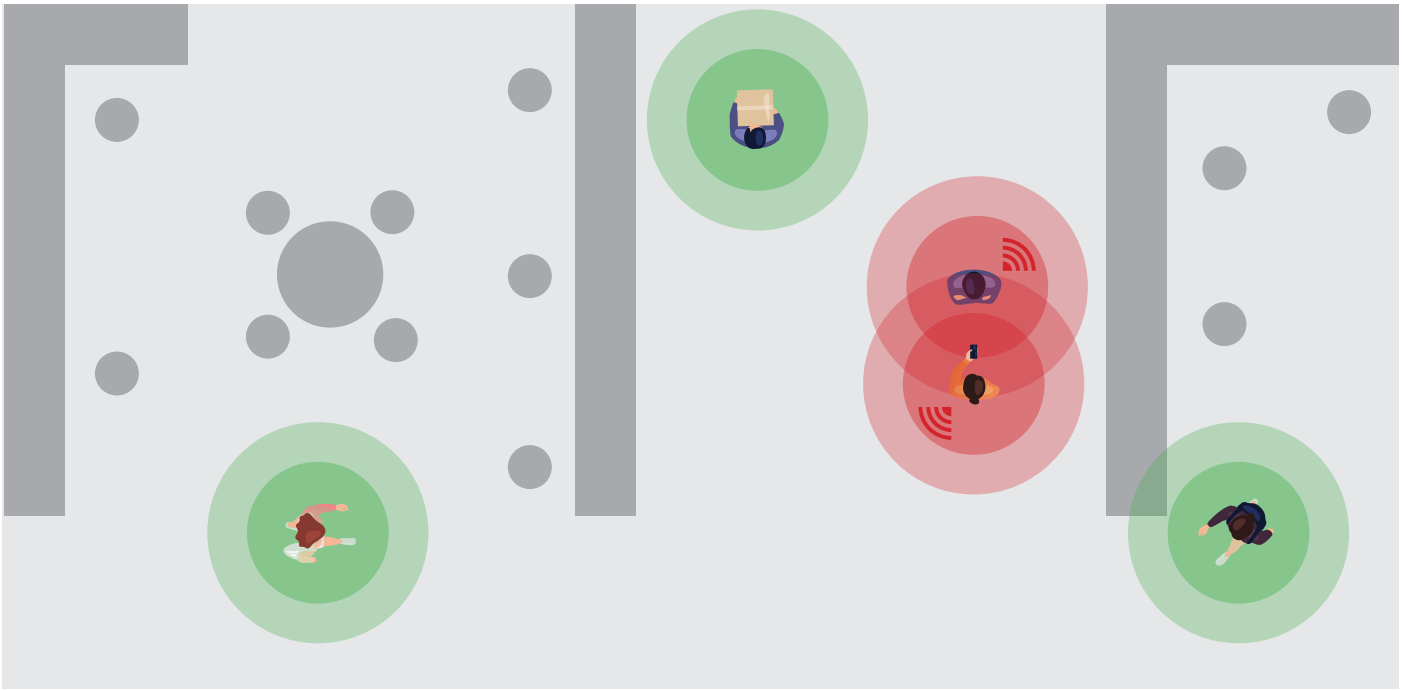
All that's required is for staff to wear the Social Distancing Tag (SD Tag/Badge Tag) which establishes a safety perimeter with two zones. The 4m 'warning' zone turns on an amber signal, whereas the 2m 'alarm' zone beeps and alerts with a red light. Please note that these distances are configurable.

The SDS uses the latest Ultra Wideband technology and does not require any infrastructure. SD Tags are equipped with vibration, buzzer and LED alert functionality, can be recharged wirelessly, and sanitised safely (IP67-rated). They also incorporate non-movement and fall warning systems.

An optional cloud-based data storage subscription is also available for weekly or on-demand reporting.

How It Works.

SHOCKWATCH®
Damage Prevention and Safety Solutions



System Components.

Social Distancing Tag

Includes 4 LED light modes, vibration alert. 3 levels of audible alert.

Social Distancing Badge Tag

Includes 4 LED light modes, vibration alert. 3 levels of audible alert. Card holder functionality.

Wireless SD Tag Base

Charging base for single SD Tag/Badge Tag.

Wireless SD Tag Station

Charging base for up to 12 SD Tags/Badge Tags.

Advantages

- Ultra Wideband radio frequency
- High-intensity LED lighting
- Two adjustable zones (0.1~4m) for warning and alarm
- No infrastructure required (Tag-to-Tag)
- Wireless charging with 16-hour battery life
- Non-movement warning system
- Fall warning system
- Waterproof (IP67) for ease of disinfection
- Panic button
- 3 levels of audible alert
- Optional GDPR-compliant cloud-based data storage with weekly or on-demand reporting
- Vibration mute
