- Clip-on holster and lanyard
- Back-up blade storage
- Built-in tape splitter
- Dual-sided edge guides
- Replacement blade storage
- Radius blunt tip blade
- Trigger lock
- Trigger activated
- Sturdy and lightweight

Reduce product damage, increase productivity. The EasyCut 2000 safety knife includes the patented radius-tip blade and multiple blade-depth settings, and an ergonomic handle that extends and retracts the blade naturally, protecting the user and product inside the box. A handy snap-on holster and lanyard system provides safe storage and prevents lost cutters, while the

back-up blade compartment enables fast and tool-free blade changes.

Enhanced blade lengths accommodate imported boxes that may be damaged or difficult to cut, while a built-in tape splitter enables quick action tape cuts that don't require a sharpened blade.

The automatic edge guide deploys instantly, setting the knife into motion for the work to begin.
